

# Dolphin iPass Cable EOL Note

---

iPass Cable EOL Note (version1)

February 10<sup>th</sup>, 2025

# 1. Scope

This notification pertains to the discontinuation of the following Dolphin iPass cable products.

## 1.1. Products affected

The following Dolphin Products will be affected:

IXCxM and IXC448-xM iPass cables (x is length in meter). All lengths and variants affected.

# 2. Reason for EOL

The decision to issue an End-of-Life (EOL) notification for iPass cables is due to the discontinuation notice from our vendor. The vendor has issued an EOL notification for the cables, with a Last Time Buy (LTB) date of **June 25, 2025**. As no direct replacement exists, deliveries of the affected iPass cable products cannot continue.

# 3. Dolphin Product Support Plan

## 3.1. Last Time Buy (LTB)

To ensure the delivery of iPass Cables, customers are required to:

- **Place orders** for the necessary quantities by **June 15, 2025**, or
- Enter an **Extended EOL Supply Agreement** with Dolphin before June 15, 2025. This agreement allows Dolphin to secure additional components for future deliveries.

## 3.2. Order Policy

- Orders placed after the issuance of this EOL notification are classified as **Non-Cancellable** and **Non-Returnable (NCNR)**. **Dolphin accepts final delivery (LTS) dates by the end of 2025.**

## 3.3. Post-EOL Support

- Dolphin may have additional units and be able to accept orders beyond the EOL date.
- These additional units will be sold on a first-come, first-serve basis, unless an Extended EOL Supply Agreement has been established with Dolphin.

# 4. Alternative products

An equivalent drop-in solution does not exist, but Dolphin is offering several alternative product lines. Please contact a Dolphin sales representative at [Sales@dolphinics.com](mailto:Sales@dolphinics.com) for more information.

Additional information on the content of this document may be requested via the Jira Service Management portal: [www.dolphinics.com/csp](http://www.dolphinics.com/csp).
