

# Dolphin IXH610, IXH610\_LB, IXH611, IXH620, IXH650, IXH660, IXS600 EOL Note

---

*IX EOL Note (version2)*

May 17<sup>th</sup>, 2021

## 1 Scope

This document constitutes an End-Of-Life Notification (EOL) letter for all Dolphin products based on IDT PCIe switches.

### 1.1 Products affected

This document applies to Dolphin product order codes IXH610, IXH610\_LB, IXH611, IXH620, IXH650, IXH660, and IXS600 all revisions.

## 2 Reason for EOL

The vendor for the IDT PCIe switch, Renesas, has issued an EOL notification dated December 4<sup>th</sup> 2020 and a LTB (Last Time Buy) date of 4<sup>th</sup> June 2021. This component is fundamental to the IX product line and no alternative direct replacement part exists.

## 3 Dolphin Product Support Plan

Based on this EOL notification from Renesas, we hereby announce an EOL for all the above-mentioned products.

### 3.1 Dolphin LTB

To secure deliveries of IX products, you must place an order with Dolphin for the required number of cards by May 31<sup>st</sup>, 2021 or enter into an Extended EOL supply agreement with Dolphin to allow Dolphin to secure additional components for future builds. Orders received after the date of this EOL notification letter are Non-Cancelable and Non-Returnable (NCNR).

Dolphin will build additional products to be able to service and deliver IX product beyond the EOL date, but these will be sold at first come, first serve basis unless you have an Extended EOL supply agreement with Dolphin.

## 4 Alternative products

Dolphin is offering the PCIe Gen3 PXH810 and PXH812 card which in many cases will be a drop-in replacement for the IXH61x. Dolphin is also offering a wide range of other Broadcom and Microchip based Gen3 and Gen4 PCIe cards, XMC cards, cPCI-S, PXle and PCIe switches and peripheral boards. Please contact your Dolphin sales representative at [sales@dolphinics.com](mailto:sales@dolphinics.com) for details.
